Dual Wireless Charging Pad

XC260

This slimline wireless charging pad brings style and practicality to any workspace, office, bedroom or living setting. Simply connect the XC260 dual pad to power at your preferred location and enjoy worry-free charging of two devices with no more power cords to check, plug and unplug all the time. This pad not only simplifies charging, but it's also designed to ensure the charging process is fast. Thanks to the built-in overheat, overcharge protection as well as

foreign object detection (e.g., coins, cards, metal surfaces and objects) XC260 also charges your smartphone safely. Removing your smartphone case is not needed as the pad also works seamlessly with most cases on the market. The elegant sturdy design does not consume space, is very light to carry in a bag and easily adds elegance to any setting.

► Wireless Qi Charging

Worry-free wireless charging: The XC260 wireless charging pad is compatible with all smartphones (iOS and Android) supporting the Qi charging standard as well as other Qi enabled accessories. Simply charge your phone by placing it on the pad, it's as easy as that.

► Fast charging

Ready to go when you are: Designed to deliver fast-charging speed with 7.5 W of power to iPhone models and 10 W to Samsung phones, this charging base spares your time. Simply leave your phone on the pad while getting ready to go, while working or before sleep. *

► Ultra-slim premium design

Slimline and elegant: With its ultra-slim, aluminum alloy base with PU leather surface, this dual wireless charging pad fits well with any workspace or living environment adding a touch of sophistication to your space. Its light and compact body also makes it perfect to tuck it in your bag and carry with you to the office or when traveling.

► Over-temperature and overcharge protection

Better safe than sorry: XC260 is equipped with all essential protection for your smartphone and to ensure safe durable use of the charging pad. Overheat protection ensures the device operates within the maximum safe temperature preventing any related damage. The overcharging protection (OVP) is designed to protect the battery of your smartphone.

Specifications

Wireless charging standard: Qi
Output power: 2 x 5W/7.5W/10W
Aluminum alloy base
PU leather surface
Light status indicator
Phone case friendly
Overheat protection
