OVERVIEW

The Edimax Smart Power Strip connects people to their homes, and the things they use every day. Designed to make homes more dynamic, functional and work better for modern lifestyles, Smart Power Strip products give users intelligent control over all of their home electronics.

The Smart Power Strip fits into any EU socket and enables you to or schedule a connected electronic device on/off from your smartphone. Just plug an appliance into the Smart Power Strip and see how this smart device can work for you and your home. Now with 4 USB outputs for charging your smart devices.

Intelligent Home

A Smart Power Strip is just the beginning. Add more Smart Power Strip products and bring your home to life in imaginative, inventive ways – it's up to you. Our Smart Power Strip EdiSmart Pro home management app can monitor, control and schedule all of the electronic devices connected to Smart Power Strip switches around your home.

Control, Check

Wi-Fi connectivity allows you to remotely control the lights, heater, Xbox, or any devices plugged into Smart Power Strip from your smartphone/tablet. Check the power on/off status while you're out and switch them on/off anywhere, anytime. No more wondering if you left the coffee pot or clothes iron on. Smart Power Strip is super-fast and stays connected 24/7.

Schedule, Save

Program intelligent schedules to make your home/office smarter and more energy efficient. Smart Power Strip was developed to suit your lifestyle No longer need to worry about walking into a dark/cold room or your house looking empty while you're on vacation. Schedule your lamp, heater and USB powered devices – Smart Power Strip can schedule anything just the way you like it!

Easy Setup

Setup couldn't be any easier and is all done on your smartphone or tablet.

Power Button

3 X Sockets   4 X USB   2 X LED
